

Washington, D. C. 20505

27 August 1983

NOTE FOR: Under Secretary of Defense
for Research and Engineering

Dick:

Sometime in the next few months I would appreciate receiving a DoD briefing on DoD's efforts with regard to super computers and artificial intelligence. It should not be a detailed technical presentation but I would like to get a sense of the scope of our effort over the next few years so I can size what the Intelligence Community ought to be pursuing, watching or piggybacking in that regard.
